iMirror

Introduce a new dimension to your TV experience with the new iMirror. Whether placed in residential environment or commercial foyers, this elegant and versatile complete TV system is sure to create an impact. Our new iMirror is a complete system with harmonic balance of beauty and technology. The Future Technologies® LCD with LED Backlight and also possibility to make it touchscreen, which combined with iMirror glass® completely disappears when turned off. Whether recessed into the wall, or hanged as a picture, the crisp and cool design of the iMirror offers not only a modern and elegant alternative to large-size flat screen TVs, but also a sophisticated decorative addition to any environment. The Future iMirror is available in any dimensions and totally customazible to meet your needs. For further information and specifications please visit our website or contact us.

iMirror QUALITY

"Future Technologies" has developed products defined and catalogued by independent experts as "the state of the art", positioning their clients and projects on the highest existing technological level. With iMirror® we deliver the highest standard of picture quality when turned on, while when turned off, the screen area completely disappears behind the iMirror, leaving your new experience and environment with nothing but an elegant mirror fixture.

Challenge us to make your dreams come true.

USE IT AS A STANDARD MIRROR

Despite its sofistication, the iMiror can be used as a standart mirror. Ask us about all the extras: light, camera, microphone, speakers...etc

USE IT AS A TV & CONTROL PANEL

Add the touch or multitouch capability and transform your iMirror in a great interface to your home automation system, CCTV, Videocom...etc.

Of course, you can expect great image quality up to 1080p and even 3D!

USE IT AS A DIGITAL CANVAS

What remains the single most useful feature of the "getting photos on canvas" concept is perhaps its ability to replace almost any kind of wall decoration and still retain a warmer and more beautiful standing relative to the decoration type replaced. Get your favorite photos and videos displayed througout the iMirror.
